

If the Northern and Eastern States tolerate the practice of carrying off our slaves, the Union must of course be very soon dissolved...

The steamer, Wilmington, lately burnt her boiler on the Mississippi, killing 6 or 7 of the hands.

A Bank called the "Ruckersville Banking Company" has gone into operation under the free banking law of Georgia.

Now that the term of ten years during which what was called the compromise act in regard to the "Tariff" was to continue, is drawing to a close, the question of revising the old miscalled "American System" begins to be seriously agitated again at the north.

The following remarks were written for last week's paper, but excluded for want of room.

Mr. Foster, U. S. Senator from Tennessee, has addressed a letter to the Legislature of that state, resigning his office, on account of instructions from the Legislature to vote for the "Independent Treasury" bill...

I then fixed up an old building which had been used for a storehouse, by putting up holders or shelves, the boards being about 18 inches apart one above another.

The second week in June I had a small crop of silk worms hatch, of the six weeks' kind, which consumed from my ree 1500 lbs. of leaves...

The silk worms required attendance about seven weeks; the first three weeks I employed two persons, one to pick leaves and the other to feed the worms...

I raised fifty bushels of excellent cocoons, and what I reeled produced one pound of silk to the bushel, which is pronounced by good judges to be better than the imported, and equally as good silk as any made from any other species of mulberry tree in our country.

But it is said the will of the people ought always to govern in a popular government. The rule is correct, but not the application of it.

Since the above was written we see that Judge White has gone on to Washington and taken his seat in the senate. We hope the event will prove that he is more of a patriot than demagogue.

We are informed, (says the Edgefield Advertiser) by a gentleman in whom perfect confidence can be placed, that the Cotton crop of General McDuffie, this year, is all average & falls to the hand.

There is proof by experiment that our agriculture in South Carolina is susceptible of improvement. Edg tables to the hand to double the average product on what are considered the best average plantations.

Now, with a convenient economy and additional help of two individuals for two weeks, I could raise a crop of one million of silk worms with the same ease and in the same length of time specified above.

fact ought to stimulate persons engaged in Agriculture to take and read agricultural papers, and to buy and read agricultural books.

We place the following article under the editorial head, where it will be seen and we trust read. The facts are worth attention.

SILK GROWING IN 1839. Experiment of Mr. Aaron Clapp of Hartford, Conn.

The great importance of the silk culture to our country, and the eagerness of the public to obtain information respecting it, renders it the duty of every one engaged in producing a silk crop, to impart all the information he is capable of giving...

With these views, and in compliance with the earnest solicitation of my fellow citizens, I give publicly the result of my experience during the past summer.

to injure the trees when picking the leaves. The leaves were all picked one at a time, and some of the leaves were 1 1/2 inches in length.

Several individuals in this vicinity have made silk this season from the morus multicaulis, with good success, and the specimens of silk that have recently been exhibited at the American Institute gives undoubted evidence that this species of mulberry trees makes equally as good silk as any other kind.

Our Rail Road.—It will be seen by the following statement, derived from the late report of MITCHELL KING, Esq. President pro. tem. of the Rail Road Company, that an expense of upwards of a million of dollars has already been incurred in the construction of the Columbia Branch...

The order for iron rails from England, by the direction of Gen. HAMILTON, before the last meeting at Asheville, to our agents in England, was reduced from 2000 to 1600 tons—the quantity required to lay the road from Branchville to Orangeburgh.

With these views, and in compliance with the earnest solicitation of my fellow citizens, I give publicly the result of my experience during the past summer.

Morus Multicaulis. THE subscriber has for sale a large number of Morus Multicaulis cuttings. In the qualities which give value for planting, viz: size and MATURITY of wood, they are believed not to be surpassed, perhaps not equalled by any others for sale in the United States. This is owing to the great distance allowed in planting as well as to suitable soil and good cultivation. Owing to the present scarcity of money, and the consequent depression in the price of every thing else, they are offered at a very reduced price. Persons wishing to purchase should apply early; because all not engaged are now offered in a distant market. Besides, if not sold before Spring the price may then be higher. Printed directions for planting and cultivating will be furnished without charge to those who purchase. M. MACLEAN. Cheraw S. C. December 4th 1839.
